Q1.1 C
Q1.2 d
Q1.3 d
Q1.4 c

Q1.5 Way 1 -> quality control
Way 2 -> quality assurance
Q.1.6 one advantage of job production is it brings higher prices, this is because customers will pay more for a customized product.
Q.1.7

Section B
Q2.1 1460 tea bags
365 days a year
1460 ÷ 365 = 4 tea bags a day.

Q2.2
One customer expectation is that they would want consistent taste in their tea bags. Customers would be de-satisfied if they didnt recieve consistent tea bags and might move to another brand of tea. Which means yorkshire tea would loose customers and possibly customer loyalty.

Q2.3
One benefit of yorkshires tea's effective logistics is that they get different teas delivered everyday. This means that they will constantly have fresh tea to be produced into teabags. This leads to customer satisfaction since ~~[illegible]~~ therefore customers will be happy with fresh tea bags which gives you a higher chance of customers consistently buying Yorkshire Tea, creating customer loyalty.

Q2.4
Customer engagement is meaningful interactions between a customer and a brand throughout the customer process.

Q2.5
One advantage for Taylors increasing the ~~[illegible]~~ customer engagement is repeat sales this helps the business because repeat sales will get the company customer loyalty because employees are engaging with the customer which creates ~~a~~ bonds between ~~[illegible]~~ workers and customers. Therefore the business will have increased sales causing more profit.

On the other ~~hand~~ hand one drawback is that ~~[illegible]~~ the quality of the product could decrease this means that employees will be too focused on engaging with customers they start to forget about the importance of the quality of the product because

Sofia

they are distracted this leads to customers noticing that the quality is worse in their tea bags and customers will become de-satisfied therefore sales will go down because the product isn't as good as it used to be which means less profit.

Overall I think that Taylors should increase their customer engagement ~~because~~ I decided this because building relationships with customers can be highly beneficial for the business ~~in the long~~ and it can help increase sales and customers will have positive reviews for the company, however when employees are building these relationships ~~the~~ they need to ensure that they can still make sure the quality of the product is as good as it can be. In the case study ~~the~~ the company have spent ~~[illegible]~~ £1,514,000 in charitable community activities in the UK ~~and £1,503,000 [illegible] to support th~~ ~~to~~ this shows that the company has realised the importance of customer engagment.

Section A

1) C
2) C
3) D
4) C

01.5) one way of identifying quality problems is quality management: Checking the product through stages. Another way is ~~customer feedback: Them complaining about the product shows problems~~ at the end. (Quality control) (Quality ensure)

01.6) one advantage of Job production is it being very flexible being able to serve any customers needs

~~01.7) Method 1: Customers seeing advertisement or the product on show. This makes the customer interest in the product. A ~~s~~ could be a buyer~~

~~method 2: Salesman try to look for customer's interest. Then will try to recommend things and making it sound like it ~~as~~ the money worths it or even give free warranty to make it more desirable~~

Method 2: Increase making customers feel better since buying something expensive they might be worried about damage and costs of that

01.8) Method 1: ~~Mkands~~ offer accessories e.g Car seat protectors, it gives a almost sense of luxury feeling making customers happy. ~~one following extra stuff on the side~~

Section B

2

365 $\overline{)1460}$ 4 Average is 4 Tea bags

02.2 One expectation is the taste of the tea, higher quality means better tasting. People ~~prioritize~~ prefer taste ~~than~~ Since tea should give pleasure on drinking it. This should be since they're using high quality leaves (the reason on the taste)

02.3) one benifit of effetive logistics is that they have a consfant flow of raw material, being reliable. This impacts the business as customers want have to wait for re stock (and the chance of them opting for other tea) they're able to sell to all potential customers since they have a low ~~just~~ chance of being out of stock. This can boost sales, customer satisfaction, and cost as if its effetive it should be lean production minum cost - maximum efficiency.

07.4) Customer engagement is when the business interacts to customers making them feel included and ~~feel~~ it's easy for them. ~~eg~~

Sayleng

02.5) I would recommend to increase customer engagement activities ~~jus~~ because I think making customers feeling included ~~and~~ is top ~~prior~~ priority as businesses want customers to be more involved, being able to see customer feedback throughout activities. They can also ~~have~~ be different to others making them unique. this means they stand out from the competitors. customers will be buying from a business which is different to standard ones. This will boost sales. ~~and~~ But doing will cost a decent amount of money also requiring time which could be used for something* else but I think there's more positives than negatives, this can also help with attracting staff as people see a business doing well and might want ~~to~~ job. Conclusion they should do it as it improves customer satisfaction, sales, ~~to~~ more employees and being to stand out - This out way the time and cost. ~~to~~

* improving the business in different range of brand

Q2.3 One factor is that quick transport. This means that will get to the shop faster. This leads the tea bag to the shop never running out of tea bags therefore the company will always have tea bags or the self. This also means there will always be sales.

Q2.4 When a company or business create a ongoing succesful relationship and can communicate.
